

Why we should implement  
CI/CD?

Long-Story Short: It will help increase revenue, and reduce costs, ensuring that our stakeholders are happy (:

**Benefit 1: Catch Compile Errors After Merge**  
(Reduce costs by minimizing developer time spent  
on fixing these issues)

## Benefit 2: Automate Infrastructure Cleanup (Reduce costs)

Benefit 3:  
Faster and More Frequent Production Deployments  
(Increase Revenue)

Benefit 4:  
Deploy to Production Without Manual Checks  
(Increase Revenue)

Thank you!
